PLASTIC CAR STOP

PRODUCT INFORMATION BROCHURE

PICTURED: PARK-IT CAR STOP

Checkers™ Motion Safety is a full service manufacturer of parking lot safety solutions. We design and manufacture traffic control products that help cars navigate and park safely. Our main goal has been to create solutions that protect motorists and pedestrians from the perils of today's parking lots. As such, Monster's products have been designed and developed with speed reduction, driver and pedestrian safety in mind. All of our solutions are manufactured from 100% recycled rubber and plastic. Rubber and plastic speed bumps or parking blocks, for example, are longer lasting, highly visible, and more car-friendly than asphalt or concrete alternatives. Not only are Monster's traffic safety solutions environmentally friendly, they can also be installed for both temporary or permanent use.

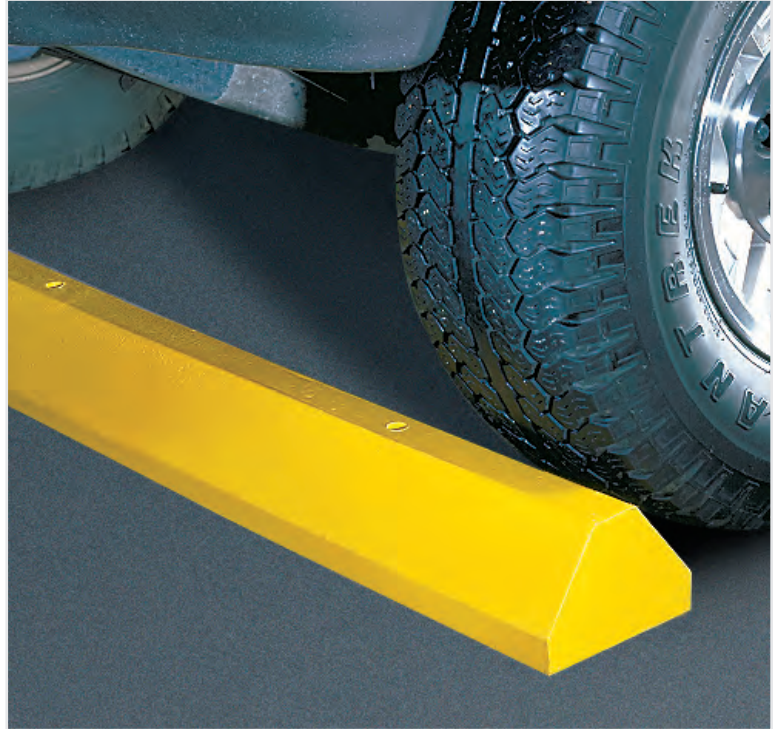

- **Plastic parking stops greatly outlast concrete competitors**
- **Plastic parking stops don't degrade like concrete parking stops, keeping parking lots aesthetically pleasing**
- **Multiple colors available**
- **High quality plastic is resistant to weather, salts, and chemicals**
- **Recycled plastic construction is environmentally friendly**
- **Sturdy plastic protects vehicles as well as curbs**
- **Vibrant safety color ensures the parking stop will be visible**
- **Easy to install, either on asphalt or concrete surfaces**
- **Used for temporary or permanent applications**
- **Great for commercial and residential applications**

CHECKERS™ PARKING STOPS replace unsightly, old, concrete parking stops with 100% recycled, solid plastic. They will not chip or crack like concrete and withstand abuse from gas, oil, salt, sunlight and chemicals. Parking Stops are molded in solid colors and never need painting. Monster Parking Stops are maintenance free and can be installed by one person.

Material: Premium Recycled Plastic

- Made from 100% recycled, solid plastic
- Never need painting
- Will not chip or crack
- Easy, one person installation
- Withstands gas, oil, salt, sunlight and chemicals
