PLASTIC SPEED BUMP
PRODUCT INFORMATION BROCHURE

PICTURED: SPEED BUMP

Checkers™ Motion Safety is a full service manufacturer of parking lot safety solutions. We design and manufacture traffic control products that help cars navigate and park safely. Our main goal has been to create solutions that protect motorists and pedestrians from the perils of today's parking lots. As such, Monster's products have been designed and developed with speed reduction, driver and pedestrian safety in mind. All of our solutions are manufactured from 100% recycled rubber and plastic. Rubber and plastic speed bumps or parking blocks, for example, are longer lasting, highly visible, and more car-friendly than asphalt or concrete alternatives. Not only are Monster's traffic safety solutions environmentally friendly, they can also be installed for both temporary or permanent use.

- **Plastic speed bumps greatly outlast concrete competitors**
- **Plastic speed bumps don't degrade like concrete parking stops, keeping parking lots aesthetically pleasing**
- **High quality plastic is resistant to weather, salts, and chemicals**
- **Recycled plastic construction is environmentally friendly**
- **Sturdy plastic protects vehicles while slowing them**
- **Available in several different colors to suit any application**
- **Easy to install, either on asphalt or concrete surfaces**
- **Can be used for temporary or permanent applications**
- **Great for both commercial and residential applications**

CHECKERS™ 100% recycled plastic Speed Bumps alert drivers to potentially hazardous driveways and parking areas. Speed Bumps will not chip or crack under heavy loads and withstand abuse from gas, oil, salt, sunlight and chemicals. Molded in solid colors, speed bumps never need painting. Checkers Speed Bumps are maintenance free and can be installed by one person.

Material: Premium Recycled Plastic

- Made from 100% recycled, solid plastic
- Never need painting
- Will not chip or crack
- Easy, one person installation
- Withstands gas, oil, salt, sunlight and chemicals
