WALL & CORNER GUARDS

PRODUCT INFORMATION BROCHURE

PICTURED: WALL GUARD AND CORNER GUARD IN USE

Checkers™ Motion Safety is a full service manufacturer of parking lot safety solutions. We design and manufacture traffic control products that help cars navigate and park safely. Our main goal has been to create solutions that protect motorists and pedestrians from the perils of today's parking lots. As such, Monster's products have been designed and developed with speed reduction, driver and pedestrian safety in mind. All of our solutions are manufactured from 100% recycled rubber and plastic. Rubber and plastic speed bumps or parking blocks, for example, are longer lasting, highly visible, and more car-friendly than asphalt or concrete alternatives. Not only are Monster's traffic safety solutions environmentally friendly, they can also be installed for both temporary or permanent use.

- **Rubber guards prevent damage to vehicles and parking structures**
- **Rubber speed humps don't degrade, keeping parking lots and streets aesthetically pleasing**
- **High quality vulcanized rubber is manufactured with sulfur additives to be stronger than traditional rubber**
- **Recycled rubber construction is environmentally friendly**
- **Plyable rubber is easy to mount**
- **Highly reflective colored tape ensures visibility**
- **Easy to install on concrete surfaces**
- **Can be used for temporary or permanent applications**
- **Great for commercial and residential applications**
- **End caps are available**

CHECKERS™ WALL AND CORNER GUARDS are designed to protect the walls, corners and pillars of parking structures. These solutions protect both vehicles and the structure itself, by preventing impacts from opening doors and bumpers.

Material: Premium Vulcanized Recycled Rubber

- High impact virgin rubber
- Long lasting and cost efficient
- Easily installed by 1 person
- Used for temporary or permanent installation
- High visibility
- CG800 and CG900 includes high intensity sheeting/reflective tape
